Hazardous Weather

Wind Advisory Friday Afternoon

In Effect from 11 am until 9 pm

Weather Forecast Office
Lubbock, TX

Issued Jan 18, 2019 2:35 AM CST

f t y NWSLubbock

weather.gov/lub

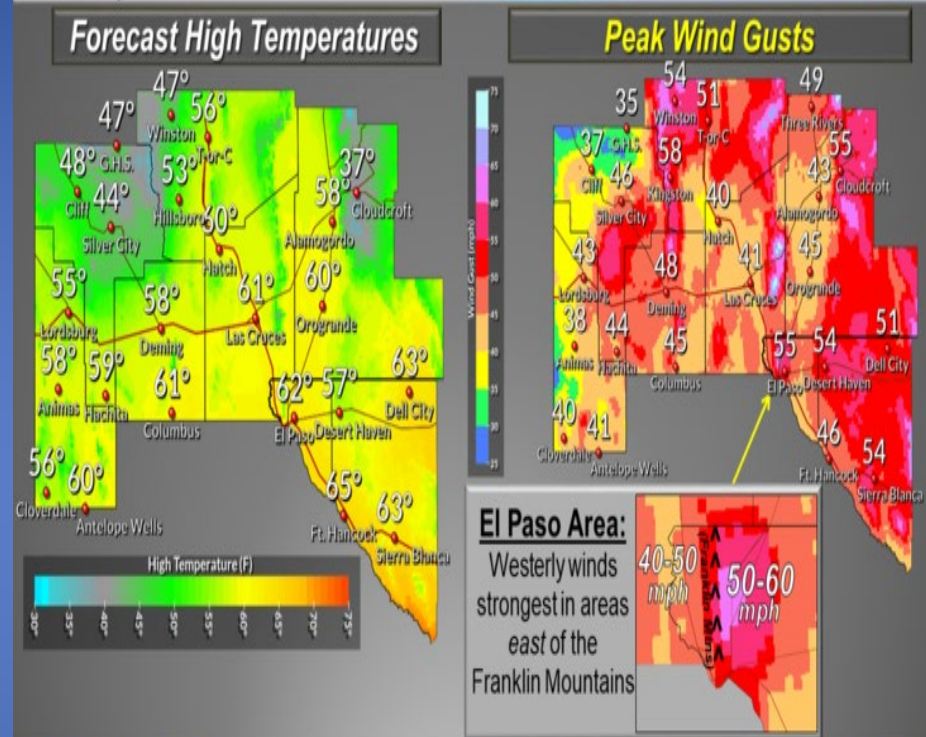

A wind advisory is in effect today from 11am until 9pm for much of the South Plains region.

Strong Winds Expected Friday

Wind Advisory in Effect for All Areas

Weather Forecast Office
El Paso, TX

Issued January 17, 2019 6:40 PM

f t y @NWSElPaso

weather.gov/EIPaso

A storm system moving over the central Rockies will bring strong west to northwest winds to the area on Friday. Peak winds during the early and late afternoon of 40 to 50 mph will be common, with a few isolated higher gusts possible, especially over areas just east of mountain ranges (examples: Northeast El Paso, WSMR HQ). There's also a slight chance of brief snow showers in the Sacramento Mountains. Skies will be partly to mostly sunny, and temperatures will still be on the mild side, but a cold front will bring cooler temperatures (but lighter winds) for Saturday.

Hazardous Weather

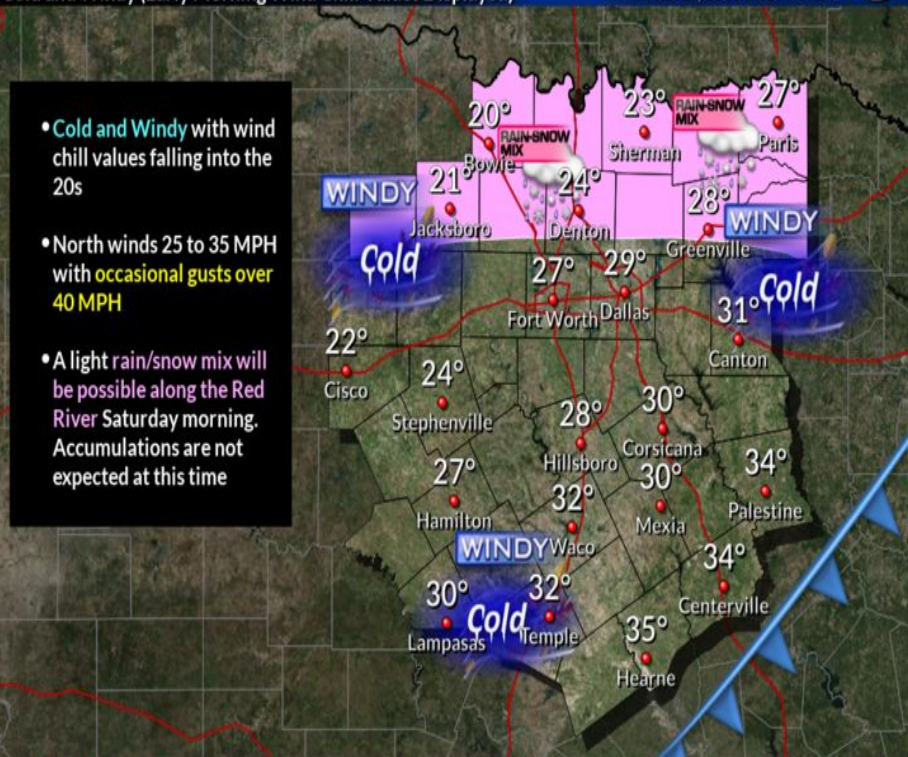

Late Tonight/Early Saturday

Weather Forecast Office
Fort Worth, TX

Cold and Windy (Early Morning Wind Chill Values Displayed)

Issued Jan 18, 2019 5:11 AM CST

- Cold and Windy with wind chill values falling into the 20s
- North winds 25 to 35 MPH with occasional gusts over 40 MPH
- A light rain/snow mix will be possible along the Red River Saturday morning. Accumulations are not expected at this time

f t y NWSFort Worth

weather.gov/fortworth

Much colder and windy conditions can be expected late tonight and Saturday behind a strong cold front. Strong north winds and falling temperatures will produce wind chill readings in the 20s and lower 30s by daybreak (a few locations along the Red River may see upper teens wind chills). A light mix of rain and snow will be possible along the Red River prior to the system exiting to the east, but at this time it still looks like accumulations are unlikely.

Strong West Winds Expected Today

Weather Forecast Office
Midland/Odessa, TX

Issued January 18, 2019 3:38 AM CT

Guadalupe Mountains will see the strongest winds

High Wind Warning

Guadalupe Mountains from 5 AM-11 PM MST

+ 45-60 MPH with gusts to 80 MPH

Davis/Apache Mountains area from 12 PM-9 PM CST

+ 30-40 MPH with gusts to 60 MPH above 6,000ft

Wind Advisory

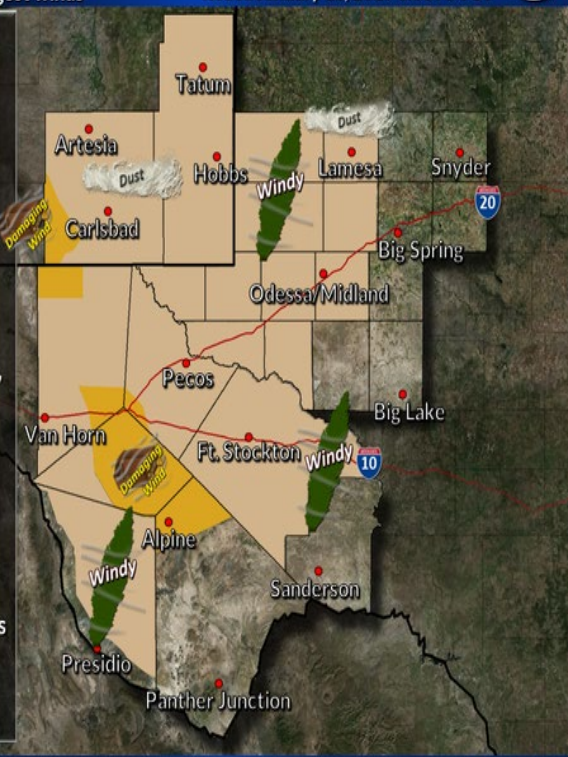

SE New Mexico, NW Permian Basin, Reeves County and Upper Trans-Pecos, Van Horn and Hwy 54 Corridor, Marfa Plateau, and Pecos County

+ 25-35 MPH with gusts 45-50 MPH

Impacts...

+ Difficult flying conditions for light aircraft due to turbulence.

+ Motorists driving high profile vehicles such as campers, vans, and tractor trailers should exercise extreme caution.

f t y NWSMidland

weather.gov/maf

High winds are expected all day today. Most locations will see strong, gusty winds, but the strongest winds will be in the Guadalupe and Davis/Apache Mountains area. Winds and possible blowing dust will cause hazardous driving conditions, so use caution if driving.

Hazardous Weather

Elevated Fire Weather Conditions Today

Weather Forecast Office

San Angelo, TX

Issued Jan 18, 2019 6:13 AM CST

What: Near Critical Fire Weather Conditions

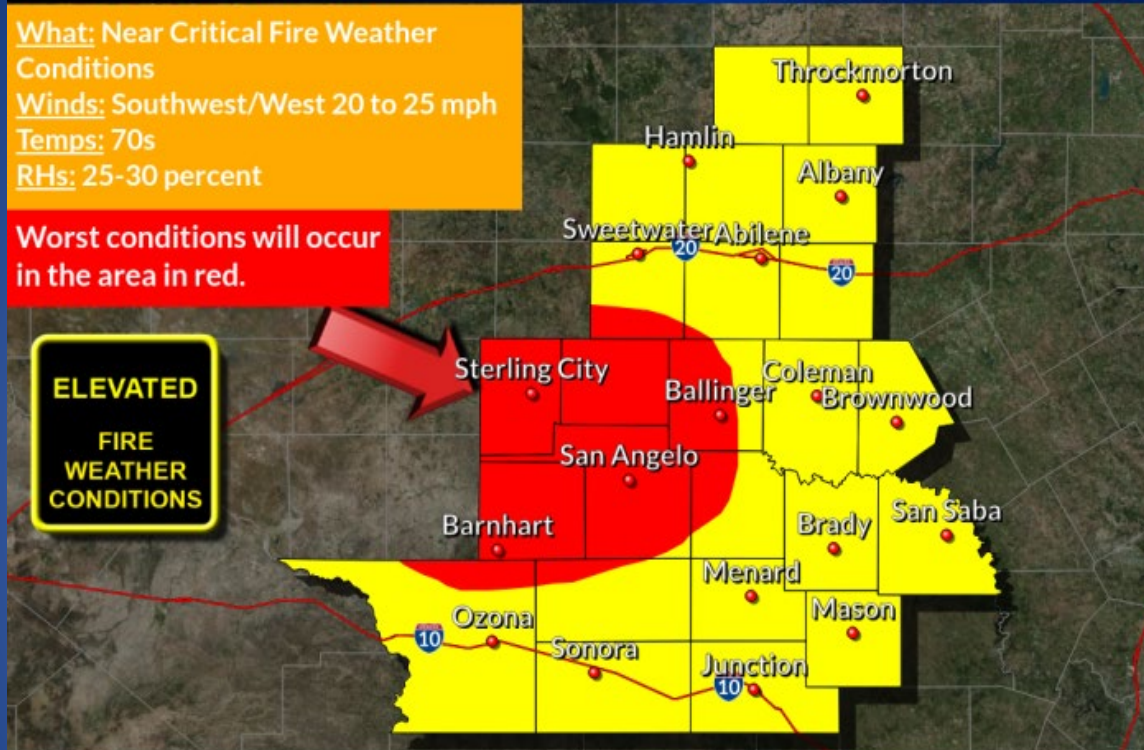

Winds: Southwest/West 20 to 25 mph

Temps: 70s

RHs: 25-30 percent

Worst conditions will occur in the area in red.

**ELEVATED
FIRE
WEATHER
CONDITIONS**

[f](#) [t](#) [v](#) NWSSanAngelo

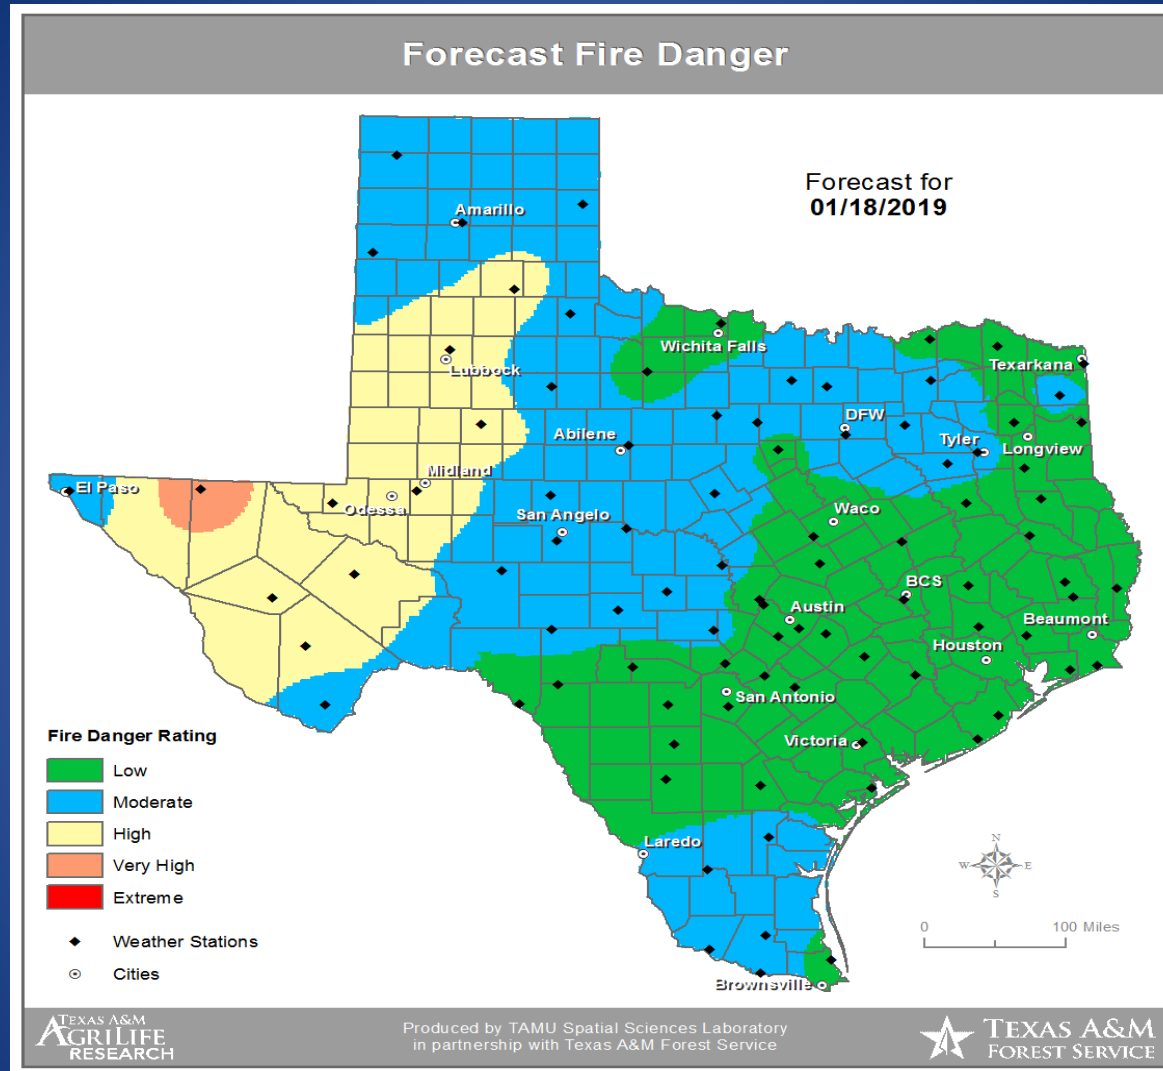

weather.gov/sjt

Elevated fire weather conditions will affect the entire area today, but especially the Concho Valley. Winds will pick up by late morning, and remain windy through the afternoon hours, combining with warm temperatures and low relative humidity values.

Weather Warning/Advisories Issued
